Security & Protection

PODZILLA® Patented Lift System

PODS containers are moved using PODZILLA, our patented lift system designed to keep containers – and their contents – level while being loaded onto and off the truck, and to easily position containers in hard-to-reach or tough-to-fit locations. Our drivers only need 12' in width and 15' in height to place your container where you need it.

State-Of-The-Art Design

Multiple Container Sizes Available

PODS® offers 3 different container sizes to meet your moving and storage needs: 7', 12' and 16' containers (7' x 7' x 8', 12' x 8' x 8', 16' x 8' x 8').**

Secure Steel Locking Mechanism

Store your items securely on-site or in one of our nearby Storage Centers.

Built to Breathe

Our containers are made to be “breathable” to allow air to circulate and discourage the buildup of moisture.

Weather-Resistant

PODS standard containers are designed with a sturdy steel frame and are built to withstand winds of up to 110 mph.

Ground-Level Loading

PODS containers rest at ground level, so you can load and unload with ease.
